## Business Analyst

### Description

Hitech Consulting is passionate about developing the very best talent, and we are currently looking for a Business Analyst to work as a leader with a keen eye for detail and problem-solving skills.

Hitech Consulting has begun the process of re-imagining our next enterprise platform of capability for our customers. Your main tasks will include performing detailed requirements analysis, documenting processes, and performing some user acceptance testing. To succeed in this role, you should have a natural analytical way of thinking and be able to explain difficult concepts to non-technical users.

If you have a proven track record of success, love working in a team environment that is competing to be the very best in what we do and you are a person with great character and values. We want to develop

Our Rockstar will be the vital link between our information technology capacity and our business objectives by supporting and ensuring the successful completion of tasks of our software product's features.

At Hitech Consulting Group we are looking for people like you: enthusiastic and resourceful, innovative, talented person, eager to improve every day in our environment, who is passionate about building highly reliable and performance data processing solutions.

### Responsibilities

Create requirement documentation such as: BRDs (Business Requirement Documents) and process flow diagrams derived from business vision and strategy

- Coordinate with multiple internal stakeholders to fulfil development release cycles
- Partner with key stakeholders to execute the product strategy roadmap and release plans
- Understand, prioritize, and communicate product priorities in terms of business value (to customers and internal stakeholders)
- Define user procedures and workflows that illustrates the customer journey navigating applications
- Communicate effectively to all levels of management to report project status and critical issues
- Measure customer adoption and market performance of new features to ensure they are delivering the value promised
- Work with developers to define product release requirements to ensure the successful delivery of new offerings and product enhancements
- Hands-on defining user-stories, sprint planning, demos, and retrospectives
- Release management, UAT testing plans, and recommend go-no-go decisions
- Collaborate with key stakeholders to define go-to-market strategy and deliverables including customer-facing documentation and presentations, sales training / tools / collateral etc.
- Evaluating business processes, anticipating requirements, uncovering areas for improvement, and developing and implementing solutions.
- Leading ongoing reviews of business processes and developing
